

# Trade with the drug store that doesn't sell dope

*It is Always the Safe Place to Carry Your Prescriptions*

NOT MANY DRUG STORES violate law and ethics by vending habit-producing narcotics. Pharmacy is a profession just the same as that of Law, Medicine, or Science. It takes years of study and practice and money to become a druggist, and Pharmacy's real purpose is to alleviate sickness and physical suffering.

**We Don't Sell Morphine, Cocaine, or Opium without a Physician's Prescription**

## PUMPS TAKEN FROM THE DENN PROPOSITIONS

General Manager Patterson Notified to Cease All Work—Stock Takes Drop to \$2.50 Per Share

General Manager Byron Patterson, of the Denn received notice by wire yesterday morning to stop all work at the mine and pull the pumps which have been working for the past three weeks lowering the water, which recently flooded the mine. As soon as the order was received Mr. Patterson issued directions to the men working on the pumps to raise them out of the shafts.

No reason for this radical move was given in the announcement to stop unwatering the mine, but it is believed that the company is short of money with which to continue the pumping operations which were costly. What the future will be for this property is a problem, as it is common knowledge that the company has been short of funds for some time.

Immediately following the arrival of the order to stop pumping, the stock began to drop in price rapidly and many local holders went to the brokerage offices to watch the boards. The stock fell off to \$2.50 before closing time.

This order to stop the pumping was a surprise to many and to no one more than Mr. Patterson. The water was going down in the shaft rapidly and yesterday morning was more than 15 feet below the 1500 level. The pumps were handling it better than had been expected when they were started and it would have been but a short time before the shaft and drifts would have been cleared of the water.

Just before the water was struck on the 1600 the drift was getting into softer country and the indications were more than encouraging for the encountering of an ore body within a short distance of the breast of the drift. The striking of the big flow of water was taken by all who are familiar with the formation of this district as an unusually good indication, coupled with the developments in the drift. So good was this indication considered that the stock instead of slumping, because of the flood of water into the mine, went up and many purchases of the stock were made.

The water rose to the 1300 level within a short time after it was struck in the drift and General Manager Patterson immediately ordered pumps installed. It took several days to get the pumps all working, but when they were once started they took hold of the water and up to yesterday morning had lowered it more than 100 feet. Now that the pumps are out of the mine and no effort is to be made to hold down the water it is expected that the shaft will fill up for several hundred feet.

All the men who were employed at the mine will be laid off with the exception of watchmen, pending the arrival of further instructions from the east. As to what will be done in the future at the Denn Mr. Patterson stated that he could not say. The only reason he could give for shutting down was the condition of the company's finances.

## THESE BUSY DAYS FOR Y. M. C. A. MEN

The canvass for subscriptions to the Y. M. C. A. is drawing to a close and on Friday evening the final scores will be announced. At that time a lively meeting is anticipated, in the association building at which time some special features will be arranged. The scores, last evening, stood as follows: Stores, Captain Phil Hips, 75; Mechanics, Captain Kitt, 56; Mines, Captain Hutton, 44; Offices, Captain Amos, 23. The canvass will close at ten o'clock Saturday evening and from the manner in which team workers are hustling it is believed that many of them have a surprise in store for the counters, when the final round up comes.

There will be no men's meeting at the association building Sunday, but a union service with the Health league will be held at the Orpheum theatre at half past two, when Dr. F. E. Shine will speak. This meeting is held as a result of a lecture delivered several weeks ago by Dr. McCormack. It will be followed by other meetings which have for their purpose the education of the public in hygiene and morals.

The first term work of the physical culture classes will close December 23 and will re-open January 6. At that time classes in wrestling and boxing will be formed for the winter term. The handball tournament starts December 26.

Tonight Prof. A. T. Nixon will meet the glee club and give instruction in breathing and voice culture.

D. W. Pollard, field secretary, has been informed that the city of Tucson has donated six lots valued at \$3,000 to the Y. M. C. A. of that city. More Drachman, a member of the Tucson city council was largely instrumental in securing the gift for the association. Secretary Pollard will visit Tucson soon and perfect plans for a permanent organization of the work there.

During the Christmas holidays an indoor athletic meet similar to the one held last year will be arranged for school boys attending Lowell and Bisbee schools. Lowell boys were the victors last year, but this year the Bisbee boys have been quietly doing some quiet training and expect to show their Lowell rivals some new stunts in indoor athletics.

### TEN MINERS ENTOMBED.

DENVER, Dec. 15.—There is little hope for the safety of the 10 miners entombed in the Leyden mine, north west of this city as a result of fire which spread to shaft No. 2 last night and cut off the escape of the men and destroyed the shaft, tipples and other surface buildings. Throughout the day rumblings beneath the ground indicated that the shaft was caving in judging the length of time it took the loosened earth to fall, the cave-ins reached very near the surface. Acting on this belief the officials of the mine roped off a considerable area at the mouth of the shaft to keep the curious away from danger. The government rescue car from Trinidad, reached Denver this evening. The officials of the mine are uncertain of the advisability of allowing anyone to enter the mine tonight. Tests made by lowering live rabbits into the shaft showed that the burning portion of the mine is unsafe.

### MISSIONARIES IN DANGER.

WASHINGTON, D. C., Dec. 15.—American missionaries at Lien Chow, China, were probably saved from massacre during the riots several weeks ago in the northeastern part of Kwang Tung province, by the prompt protective measures of Col. Lui, commander of the small Chinese military force there, according to details made public in the state department today. All Chinese schools in Lien Chow were destroyed by the mob. On Oct. 31 the riots were renewed, the ocean being transferred to Sam Kwang. The property destroyed there included the American Presbyterian school and chapel, the Baptist chapel and the house of Miss Johnston, an independent missionary.

## PIONEER ED. PECK IS FOUND DEAD

Ed Peck was found dead in his bed at Nogales Wednesday morning. He spent most of last week in Tombstone where he was a juror in the federal court.

Ed Peck came to Arizona in 1863. He was a scout under General Crook and helped materially in wresting the territory from the dominating influence of the savage Apaches. Some of the exciting scenes in Indian warfare, in which he participated—notably the "Pinalo Treaty"—proposed and carried into execution by Kink Woolsey—would be related by Mr. Peck, as if it were an event of every day occurrence.

Mr. Peck was a thorough Arizonian and gave the best that was in him for the advancement and upbuilding of the territory. His many friends in Cochise county, as well as throughout the territory, will read with sorrow this announcement of his death. He was 75 years of age, when, apparently without the slightest suffering, physically or mentally he died.

During his early days in the territory he discovered a silver mine, which was named after him. It was located in the Bradshaw mountains of Yavapai county and with the ex-

ception of the Silver King of Pinal county was the greatest producer of silver of any mine in the territory.

### EXPANDING CIVIL SERVICE.

BALTIMORE, Dec. 15.—The opening sessions of the meeting of the national civil service reform association today was notable for the length to which members desire the government to go in the application of the merit system. If the ideas of the association prevail, virtually only the president and vice president and cabinet of the United States will be exempt under civil service rules.

L. L. GILMAN

TWO STORES

**DIAMONDS**  
My stock of loose diamonds is very large. The White and Blue White Perfect in weight, from 1-4 to 2-12 karat at prices you will like and can't beat, ask to see the line.
